

SITRAIN Malaysia Volume 3

# SITRAIN Newsletter 2017

12 April 2017

SITRAIN Malaysia Happenings:

2nd Quarter has just passed and SITRAIN Malaysia would like to share many interesting events that took place in Malaysia. As the training partner we paired with the respective BU leads by placing a small booth to add value to their events and also creating awareness about SITRAIN to public.

1. Water Innovation Forum
2. Future of Manufacturing in Food & Beverage
3. ASEAN Process Safety Workshop 2017
4. New Training Center for Process Instrumentation and Weighing Technology

## 1. Water Innovation Forum

Recently our PA team splashed themselves in the water world by inviting all our potential Water and Wasterwater Consultants and Government Bodies and Corporations linked to Water for "WATER INNOVATION FORUM 2017". The Water Innovation Forum was also accredited with CDP Hours from The Institute of Engineering Malaysia ( IEM), which attracted quite a number of Professional Engineers attending the forum.

With the Theme " Driving Operational Efficiency with Digitalization" being the main topic attracted a more than 20 companies from the Water Industry. The event which was held on 23rd February at the Royale Chulan Damansara Hotel, marked a great success for our Water Team

## ■ 2. Future of Manufacturing in Food & Beverage

" Truly a Theatrical experience" a remark made by many participants that recently attended our Future of Manufacturing in Food & Beverage which was held in Damansara Performance Arts Center (DPAC). Welcome note presented by our Senior VP, Adam Yee and then followed by a play by Siemens actor & actress - Alex Zimmerman and Justina Yoo. The audience was brought to laughter and interesting journey to the F&B future by Siemens sophisticated electronic automation solutions

Presenters from Singapore Jorey Guzman and Uwe Schumann was playing through the Digital Workflow World which consist simulation, cloud solution and complex regulation process. Participants which were from mainly the F&B industry was mesmerized by the whole automation package that Siemens has to offer. The F&B event ended well with a Giantic Group photograph session marking the end of a fantastic Future of Manufacturing event. Great intense networking was being held by all Siemens FA promoters and customers. Many participants walked back happily with their Lucky Draw winnings and was looking forward to an interesting Siemens event in the future.

### ■ 3. ASEAN Process Safety Workshop 2017

ASEAN Process Safety 2017 which was held recently in KL, Malaysia was participated by 3 countries from Vietnam, Singapore and Malaysia. Both key partners from the respective countries also joined together to make this event an information gathering venue for updating themselves in latest Process Safety techniques. Process Safety plays an important role in the Oil & Gas Industry, so our speakers from Germany, Thomas Leicht and Michael Richter prepared themselves for their challenging customers enquiries.

The focus on Emergency Shutdown Systems was specially prepared for Petronas and the contents touched on application level of Siemens Functional safety systems. We wish the Process Safety Team a great year ahead and as requested by Petronas, lets do another event with attendance of various Operators, as the need for Process Safety in the Oil & Gas field are very important indeed.

#### ■ 4. New Training Center for Process Instrumentation and Weighing Technology

##### Training Center Process Instrumentation

###### Courses by Training Center(TC)

###### Courses by Product Groups

###### eLearning

From end July 2017 our Training Center for Process Instrumentation and Weighing Technology will be opened. Benefit from our newly designed portfolio about technical training in pressure, temperature, flow, and level measurement technology as well as electro-pneumatic positioners and weighing technology. Expect professional trainers and facilities as well as an attractive training portfolio and modern, digitally supported training methods from us!
